Wheat in Resilient Position.	
Chicago, Ill., Nov. 13.—Powerful bear corn theories owe their inception entirely to the corn price level. Our letter of Nov. 7 covered the November and December period. Serious declines are a rarity at this time but corn is often in a position that invites pressure after rallies. The investor should welcome any bear success. It will mean durable investment points.	

The wheat situation is delicately balanced. The Nov. 17 United States wheat visible of probably 57,000,000 will compare with 53,000,000 one year ago. Top for the present visible on the movement should arrive in next five weeks. One year ago it came Jan. 18 and two years ago on Dec. 15. The past two crop years are very similar to the present crop year and the May wheat low proved a standard purchasing basis in November each year.	
--	--

Seventy-cent level is probably the uncorroborated rubicon for December corn. Former price performances of December corn flatter this idea. The great winter delivery month may expire a little below the magnetic figure

WAGNER'S REVIEW

Closing Stock Letter.

Nov. 13.—Today's market seemed to be more completely under the influence of the Mexican uncertainty than ever. The price changes were small and it would seem that about 90 per cent of the transactions were of professional origin. Early in the day Washington dispatches were to the effect that the president would issue a statement as to the Mexican status this afternoon; later dispatches were just to the contrary.

In some quarters the delay is looked on as being encouraging and in any event it appears that no open rupture has as yet occurred, as the American charge d'affaires is remaining in Mexico City. There was nothing in the day's news of market making material, and even the announcement of failure of an old established banking firm failed to move the market even fractionally. As we view it the market demonstrates great inherent strength in its ability to maintain the current level of quotations in the face of all the Mexican uncertainty; with this out of the way, better things should be ahead.

Wheat in Resilient Position. Chicago, Ill., Nov. 13.—Powerful bear corn theories owe their inception entirely to the corn price level. Our letter of Nov. 7 covered the November and December period. Serious declines are a rarity at this time but corn is often in a position that invites pressure after rallies. The investor should welcome any bear success. It will mean durable investment points.

The wheat situation is delicately balanced. The Nov. 17 United States wheat visible of probably 57,000,000 will compare with 53,000,000 one year ago. Top for the present visible on the movement should arrive in next five weeks. One year ago it came Jan. 18 and two years ago on Dec. 15. The past two crop years are very similar to the present crop year and the May wheat low proved a standard purchasing basis in November each year.
